Protocol 5 / Matched interventions and equivalence

aINS intervention

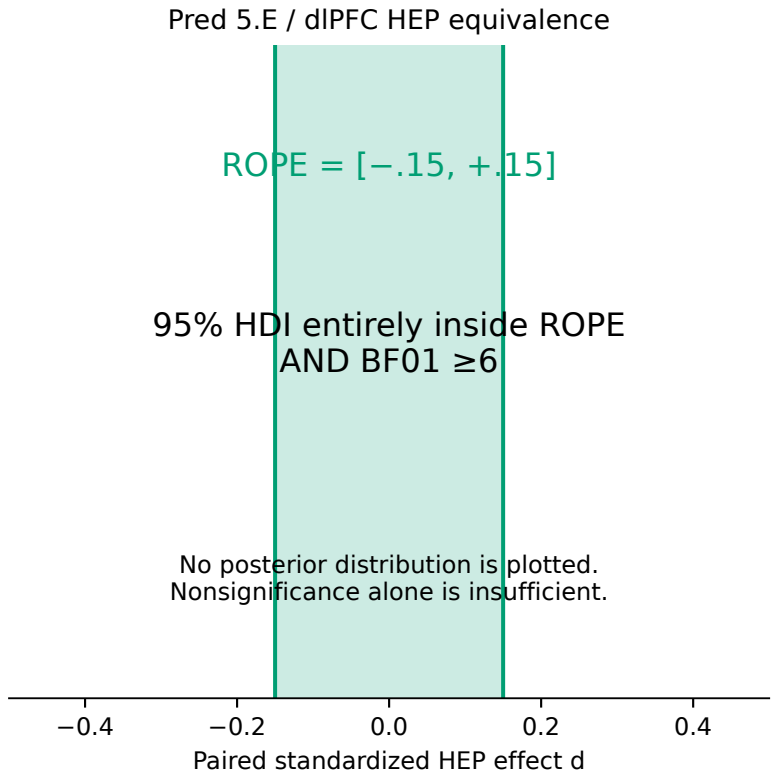
tFUS / dTMS hierarchy
Independent engagement gate + matched sham

Frontoparietal interventions

dlPFC / PPC TMS + registered reference
Use direct dissociation contrasts

PCImax measurement

Separate resting pre/post probes
≥150 clean pulses each; not task trials



Protocol 5, specification 1.1.0. No observed outcomes. Enroll 52 / analyzable target 44; 5.C / 5.D moderation requires multiplicity lock.
